

# Harnessing the power of patient lists in Cerner

# What you can do with patient lists

- Create location based lists for ease of work-safer, quicker
- Create custom lists to support audit, research, workflows, etc
- Proxy all such lists for team based working
- Support the handover process and ward rounds-immediate access to new results, add sticky notes, view alerts
- View patient snapshot of diagnosis, problems and allergies all from one screen

All **Workflows lists** patient, Inpatient Waiting List, Outpatient and **Location lists** **Audit lists**
